Education

Carnegie Mellon University , Heinz College Master of Science in Artificial Intelligence Systems Management <i>STEM-designated program in operationalizing AI: AI strategy, responsible AI, cybersecurity for AI/ML, agentic technologies, and enterprise AI deployment.</i>	Aug 2026 – Dec 2027
Savitribai Phule Pune University (PVG's College of Engineering), Nashik, India Bachelor of Engineering in Artificial Intelligence & Data Science	Aug 2022 – Jun 2026 GPA: 3.75/4.0 (WES)

Experience

Loopin — Founder & Product Lead - Fragmented event discovery left local tech communities invisible to newcomers; founded an open-source discovery platform and led a cross-functional team of 8 from product strategy through public launch - Scoped out ticketing, sign-in, and data capture to protect community trust; onboarded 5 established tech communities and became Visibility Partner for the NASA International Space Apps Challenge - Took an unfunded student project to national visibility: #38 Product of the Day on Product Hunt and a top-60 selection with a dedicated booth at IndiaFOSS 2025 (3,000+ attendees); documented the trust-vs-control strategy as a published case study (SSRN, 2026)	Jun 2025 – Dec 2025
MaverickAI — Founder & Product Lead - Blunt automated blocking silenced legitimate users while small teams could not afford moderation tooling; founded an open-source AI content-moderation tool and led 5–8 contributors around false-positive vs. safety trade-offs - Designed the human-override and escalation paths that let moderators reverse model decisions — the assurance pattern that made the tool defensible; selected for Kumbhathon incubation and published as a governance framework (Zenodo, 2025)	Oct 2024 – Sep 2025
MarketPlace — Founder & Community Lead - Students had no trusted channel to exchange books and materials on campus; built and grew a peer-to-peer marketplace community to roughly 900 members during the first year of engineering - Set the moderation and trust norms that held as it scaled, then handed it to a successor team so it outlived my graduation	Jun 2023 – Jul 2025

Projects

Rudhiraksh — Privacy-Preserving Healthcare LLM Architecture (FCH) - LLMs over patient records invent clinical values and leak protected health information; designed a fact-curated architecture where a deterministic layer computes each clinical fact under scoped role and tenant access control, leaving the model only to phrase the result in plain language - Cut per-patient prompt size by ~55% and removed 23 of 24 identifying fields with no loss of accuracy; deployed in a live blood-bank platform, shipped on Google Play, and published as first author (IJCRT, 2026)	2025 – 2026
---	-------------

Leadership & Community

President (2025) & **Vice President** (2024), SAIGE — Society of AI & GenAI (AI&DS dept. association), PVGCOE
Co-Organizer, FOSS United (Nashik Chapter); **AI/ML Lead**, GDG on Campus, PVGCOEN
Speaking: 8+ talks incl. a university keynote (“Building AI Agents,” Sandip University); organized/judged 15+ events
Awards: 1st place, TechFest 2024 Hackathon, Sandip University × Winjit Technologies; Entrepreneurship Excellence Award — Ecosystem Enabler, ENSIN Forum (2025)

Writing & Research

“FCH: A Fact-Curated Context Architecture for Reliable and Privacy-Preserving Healthcare LLM Systems”
International Journal of Creative Research Thoughts (IJCRT), 2026 — First author
“Validating Community as a Service: A Product Strategy Case Study of Loopin City”
Social Science Research Network (SSRN), 2026
“A Research Framework for Modernizing Thalassemia Data Ecosystems under India’s Digital Health Mission”
International Journal for Research in Applied Science & Engineering Technology (IJRASET), 2025
“Democratizing Content Moderation: A Theoretical Framework for Small Businesses and Startups”
Zenodo, 2025

Skills

Product Management: Product strategy & roadmapping, backlog prioritization, PRDs & product specs, MVP scoping, user research, experimentation & A/B testing, go-to-market, stakeholder alignment, working with engineering teams
AI Product: LLM & generative-AI applications, prompt engineering, agentic workflows, AI use-case identification & feasibility, model evaluation & evals, AI safety & guardrails, responsible AI
Data & Tools: SQL, Python, applied statistics (sampling, precision/recall, error analysis), Jira, Figma, Git/GitHub, Notion
Languages: English (Fluent), Hindi (Native), Marathi (Conversational)
